

# RC4 / RC6

## Front and Rear Brake Upgrade

### Applications

Road and track use

### Key features and benefits

- High friction pads increase stopping power
- Increased pad area reduces temperatures and increases pad life
- Steel staggered pistons in order to ensure even pad wear
- Stainless steel pistons as standard for improved resistance to thermal conductivity
- Pin mounted pads for quicker and easier pad change

### Part numbers

	Description
BKC7059ZG04	GTR R35 (grey)
BKC7059ZG05	GTR R35 (sky blue)
BKC7059ZG06	GTR R35 (red)
BKC7059ZG02	BMW E90 M3 and BMW 1M (grey)
BKC7059Y07	BMW F80 M2/M3/M4 (red w/ Ferodo pads)
BKC7059Y08	BMW F80 M2/M3/M4 (grey w/ Ferodo pads)
BKC7059Y09	BMW F80 M2/M3/M4 (red w/ Pagid pads)
BKC7059Y10	BMW F80 M2/M3/M4 (grey w/ Pagid pads)

### Specifications

- 2 piece forged aluminium design
- High temperature seal material as used in highest levels of motorsport
- RC4 disc diameter 330-360mm, width 28-32mm.  
Pad area 66.1cm<sup>2</sup>
- RC6 disc diameter 380-410mm, width 34-36mm.  
Pad area 117.5cm<sup>2</sup>
- Fits many 18" and larger wheels

▲ 6 piston caliper

▲ 4 piston caliper

▲ RC6 brake kit

▲ RC4 brake kit
